Ina Klaric

+31 62 507 0705 | inaklaric007@gmail.com | GitHub | Google Scholar | Amsterdam, NL

SUMMARY

AI Master's student (University of Amsterdam) with hands-on experience across the ML/NLP pipeline – from production data engineering at a financial institution to peer-reviewed reproducibility research in GNNs, psycholinguistics, and IR. Three co-authored publications since 2025, including work presented at Princeton and accepted to SIGIR 2026.

EXPERIENCE

Robeco 2025 – Present
Data Science & Engineering Working Student Amsterdam, NL

- Design and maintain **ETL data pipelines** that ingest and structure financial reports for downstream quantitative analysis
- Build **NLP-based metadata extraction** models to automatically tag and classify unstructured financial documents
- Develop **semantic search and similarity-detection** systems to improve information retrieval across internal repositories

Tilburg University 2022 – 2024
Teaching Assistant – Intro. to Machine Learning & Intro. to AI Tilburg, NL

- Designed and authored **coding assignments** covering supervised learning, neural networks, and search algorithms for cohorts of 50+ students
- Produced instructional content and graded programming assignments and essays across two academic years

Undabot 2020 – 2021
Programming Department Assistant Internship Zagreb, HR

- Supported **technical recruitment** of software developers, including screening and coordinating interviews
- Contributed to **website development** and conducted structured **competitor research** to inform product strategy

PUBLICATIONS

The Powerless Noise: How Experimental Settings Shape the Reported Power of Noise 2026

- Mazuryk, M., Dolmans, F., Gehringer, L., **Klaric, I.**, Ju, J., & Aliannejadi, M. *SIGIR 2026 Reproducibility Track* (accepted). Investigated how experimental design choices shape the reported statistical power of noise-based IR methods. arXiv:2607.03615

What Makes Linguistic Representations Good Models of High-Level Visual Perception in the Human Brain? 2026

- Bavaresco, A., **Klaric, I.**, Fernández, R., & Moens, M.F. Examined which properties of language-model representations best predict high-level visual cortex activity. arXiv:2607.16214

[RE] GNNBoundary: Finding Boundaries and Going Beyond Them 2025

- Bertrand, J.H., Bierling, L., **Klaric, I.**, & Wezenberg, A. *Transactions on Machine Learning Research*. Reproduced and extended a model-level GNN explainability method across additional datasets. **Presented at MLRC, Princeton University**

EDUCATION

University of Amsterdam 2024 – Present
Master of Artificial Intelligence – ML, DL & NLP Amsterdam, NL

Tilburg University 2021 – 2024
Bachelor of Cognitive Science and Artificial Intelligence GPA: 8.2/10

Monash University Malaysia 2023
Exchange Semester GPA: 8.5/10

PROJECTS & LEADERSHIP

Study Association ENIGMA – Founder & Initial Board Member 2021 – 2023

- Co-founded a student association from scratch, establishing governance and organizing academic/social events across AI and cognitive science programs

"Behind the Tech of ChatGPT" – Lecture Moderator, Studium Generale 2022

- Moderated a public lecture on LLM architecture and societal impact for a general university audience

SKILLS

Programming: Python, R, C#

ML/DL Frameworks: PyTorch, TensorFlow, Scikit-learn

Specializations: NLP, Semantic Search & Embeddings, Statistical Analysis, Data Pipelines & ETL, Reproducible Research

Other Competencies: Academic Research & Peer Review, Project Coordination, Teaching & Curriculum Design, Leadership, Public Speaking

Languages: Croatian (Native), English (Fluent), Spanish (Conversational)
